American Tradition Series

Timeless Beauty.

There are some things that never go out of style. They are timeless; they are classic. That is what Haas Door had in mind when we designed our American Tradition Series™ garage doors. Imagine the beauty of the 1800's carriage house, the tall rooflines, warm gaslights, and the elegant handcrafted wooden doors detailed with wrought iron hardware. At Haas Door we have taken all the elegance of the original wooden carriage house door and translated it into a beautifully wood grained embossed door. The heart of the American Tradition Series™ has 21st century materials. Combined with modern technology, you have a beautiful garage door that provides a stronger barrier to the elements than wood. There is beauty, versatility and quality in the products we produce at Haas Door.

American TRADITION S E R I E S

Enjoy the handcrafted quality and rich traditional carriage house style without the maintenance of wood. The American Tradition Series™ doors contain CFC free polyurethane insulation with a calculated R value of 13.45. They are available in four base colors: white, almond, gray, and sandstone. The overlay boards are painted white as standard. They are also available painted in the four base colors, with an option to mix and match. *(example: almond boards on a sandstone door).*

360 RESIDENTIAL ALUMINUM S E R I E S

RA 360 Series

Contemporary Style.

Take your home to a new level of sophistication with a 360 Series residential aluminum garage door from Haas Door. Each door is hand crafted and will add a modern contemporary look to any home. These doors feature a clean, sophisticated straight line look that is not only architecturally pleasing but will further enhance the elegance of your home.

Manufactured with rust and corrosion free commercial grade aluminum, each 360 Series door is built with tongue and groove section joints that will remain strong and durable for the life of the door.

The 360 series is available in seven painted finishes, along with three anodized colors. Custom-matched color and powder coating is also available. Glass options include 1/8 inch tempered, 1/4 inch laminate or 1/2 inch insulated tempered glass available in a variety of styles.

Add a new level of elegance to your home by installing a Haas 360 Series garage door today. Watch as your neighbors take notice of the clean, sophisticated and contemporary look. For more information, please visit our website: www.haasdoor.com

2000 series

2000 Series

Built to Last.

The 2000 Series residential garage doors are not just beautiful, but are among the most energy efficient doors in the market, featuring a calculated R-value of 17.66. The 2000 Series doors are 2 inches thick, manufactured with heavy gauge galvanized steel that incorporates the look of embossed wood grain, and filled with dense CFC free polyurethane foam insulation.

A full line of panel styles and window options are also available. Quality, service, and pride in workmanship are what make Haas doors the best value available on the market. So much so, that each door is backed by a Lifetime Limited Warranty. Imagine the curb appeal our 2000 Series doors will add to your home! WOOD COLLECTION

Wood Collection

The Beauty of Wood Without the Maintenance.

The Haas Door Wood Collection doors are available in a rich oak or cherry baked on custom finish that gives you the exact appearance of real wood. They are crafted from 26 gauge, galvanized steel, and available on our 600, 700, and 2000 series residential doors. All of this beauty comes without the maintenance of wood or fiberglass, and is covered by our Limited Lifetime Warranty. With the Haas Door Wood Collection no one will know the difference unless you tell them.

600 Series

Make a Statement.

The 600 Series combines the look of deep embossed wood grain with the strength and durability of heavy gauge galvanized steel for years of virtually maintenance free use without the worry of warping, cracking, or rotting. This series provides maximum energy efficiency with 1 3/8" thick, CFC free, polyurethane insulation that provides more than five times the insulating value of wood. Backed by a Limited Lifetime Warranty, the 600 Series is ideal in all climates and offers a full range of color and window options. Adding beauty and value to your home has never been so easy!

Weather Seal and Wind Load

All Haas garage doors include a heavy vinyl bottom weather seal that seals out the elements and repels the most hostile weather conditions.

Haas garage doors are available in a wide range of design pressures for wind load requirements. Contact your local Haas Door dealer for more information about wind load requirements in your area.

Unique Paint System

All Haas steel garage doors include a three-tier, corrosion resistant protective finish with a polyurethane prime and a durable polyester finish coat on the interior and exterior. Haas Door's paint thickness is one of the highest in the industry.

Due to the printing process, colors may vary. For the most accurate color match, see your Haas dealer for a metal color selector.

Haas Door is Committed to Quality.

As a member of the Door and Access Systems Manufacturers Association (DASMA), Haas Door is committed to industry standards for quality and safety. In addition to these guidelines, Haas Door has developed its own quality assurance procedures.

Each raw material used in the manufacturing process is inspected daily for quality assurance. Steel used on the inside and outside skins is checked for accuracy in thickness and finish. The insulation material, a high density CFC free polyurethane foam, is tested continuously on each production line to insure that the correct density, blend of material, cure time and calculated R-values are achieved.

Samples of manufactured doors are tested for quality and durability. Doors are cycled tens of thousands of times to test the performance and endurance of the sections, hinges, springs, cables, rollers, bottom seals, and track. Strength is measured using two separate tests. Individual sections are subjected to a dead load test and complete doors are wind load tested. This ensures that Haas garage doors will meet wind load requirements for building codes across the country.

Haas continues to perform testing outside of the manufacturing facility, as both prototype and current doors are installed in various locations and monitored for durability. External labs are also used to test specific components to ensure quality standards.

The final layer of quality assurance for customers comes in the form of a Limited Lifetime Warranty on all Haas garage doors. Quality people and quality products are what make Haas Door the best garage door manufacturer in the industry. Open the door to endless possibilities!

Environmental Responsibility

Haas Door Company manufactures all garage doors in the U.S. and is committed to providing quality products that are safe for our customers and to the environment. Haas garage doors are made from steel that contains 80% recycled material. A plastic thermal break, made with recycled materials, separates each door section to eliminate metal-to-metal contact and the transfer of temperature. Haas also uses CFC-free polyurethane insulation, which results in some of the most energy-efficient doors on the market. Good for the environment, and saves energy!

Haas Door has also implemented an ongoing improvement plan to gain efficiency and reduce waste, including a recycling program for scrap metal, cardboard and plastic. Many suppliers are regional, which minimizes fuel costs and material packaging is reused or recycled whenever possible.
